

Technical Datasheet

Trade name : BIO-CIRCLE L
Reviewed: 11.11.2025
Date of print : 11.11.2025

Page : 1 of 1

Description

BIO-CIRCLE L is an effective, mildly alkaline, surfactant cleaner with microorganisms (Risk Group 1: No risk for human beings and vertebrate animals, according to the current state of the art), for use in the BIO-CIRCLE Parts Washers for cleaning and degreasing individual pieces and tools in workshops, industry, and service settings. For use in the food industry: NSF registered (Reg.-No. 139721, Cat. Code C1)

Application

BIO-CIRCLE L is a cleaning agent for the BIO-CIRCLE Parts Washer. Pour BIO-CIRCLE L undiluted into the BIO-CIRCLE Parts Washers; do not add water! Fill only with genuine BIO-CIRCLE L.

Do not add strong acids, alkalis, disinfectants, or solvents to the BIO-CIRCLE L.

For stubborn dirt, it may be helpful to pre-treat the parts in an immersion bath. The compatible "CB 100" product line (e.g., in a CLEAN BOX) can be used for this purpose.

When used in the food industry: Rinse the surface with potable water after cleaning.

Concentration recommendations (in volume%) for typical uses of the product:

BIO-CIRCLE Parts Washers	100
--------------------------	-----

Compatibility with common materials:

Steel / Stainless steel	resistant	Aluminium	limited resistant	Non-ferrous metals	not resistant
plastics	resistant	painted surfaces	resistant	Galvanized surfaces	resistant

In the case of sensitive materials, please test the product on a sample or an inconspicuous part of the individual piece before use. If you are unsure, we will be happy to advise you. Further information on labeling, handling and disposal of the product is available from the safety data sheet.

Key to above table :

resistant	limited resistant	not resistant
-----------	-------------------	---------------

Environmental Aspects

BIO-CIRCLE L contains no VOCs, as defined by EU legislation, and provides an alternative to conventional, solvent-based degreasing methods. The product is used in BIO-CIRCLE Parts Washer, a closed loop system. Thanks to the contained microorganisms, oils are broken down, which extends the cleaning agent's service life. The product's low hazard potential also increases workplace safety.

Classification according to Regulation (EC) No.1272/2008 [CLP]

Not classified according to CLP regulation

Transport information

No dangerous goods according to the transport guidelines

Water hazard class (Classification according to AwSV)

Water hazard class : 1 (Slightly hazardous to water)
